THE NEWEST 2 CYLINDER SOLUTION GLOBALLY

创新的跨临界二氧化碳两缸压缩机系列

CD-2 RANGE

CO₂ TRANSCRITICAL APPLICATIONS

The new **CD-2** range represent the 4th generation of **CO₂ transcritical compressors**, designed using the most modern calculation software such as **FEM** and **3D Modelling**. Particular attention has been paid to the heat exchange phenomena between the part of high and low pressure of the compressor leading to the adoption of an innovative design that optimizes the efficiency of the machine.

新的CD-2系列代表了第四代CO₂跨临界压缩机，采用最先进的计算软件设计（如FEM和3D建模）。优化了压缩机高压和低压部分之间的热交换设计，从而使压缩机的效率达到了一个新的境界。
